

Y plant a'r ysgolfeistr, Benjamin Williams, ym 1889

Y bechgyn a'r ysgolfeistr, John Davies, ym 1896

Tua dechrau 1898 cofnodir achwyniad gan yr Arolygwr ynglŷn â chyflwr yr ysgol. Gorchymynnodd y dylid ysgubo a glanhau'r ysgol yn gyson. Oni chât'r adeilad ei lanhau'n drwyadl bob dydd, ni chymeradwyid talu rhagor o grant.

7.11.1904—The morning has been very stormy and as a consequence only 29 children assembled. Another reason why children are not at school is the impossibility of lighting a fire in the stove, and, until a new stove is provided the school will have to go without a fire, which will cause absence from school. The attendance has been so good with the exception of last week that I did not mark today, so as not to lower the average.

9.11.'04—There have been several complaints about the cold state of the school-room due to lack of proper stove. I have written to the Education Office at Carmarthen and I have now received a reply that the matter is under consideration and will receive full investigation.

(Daeth y Byrddau Ysgol i ben yn 1902 ac o hynny ymlaen 'roedd popeth o dan awdurdod y Pwyllgor Addysg).

15.11.'04—Fire has now been supplied. We had the first fire yesterday, Nov. 14th.

19.11.'06—The stove works so badly that I am obliged to dismiss the children before usual time.

17.1.'07—Mr. Joshua Evans, Sanitary Inspector visited the school.

26.11.'07—The stove acts so badly, cannot see children some days with smoke, and it burns our eyes fearfully, having tried opening doors and windows, no better—it is an every day occurrence.

3.12.'07—The smoke nuisance causes a lot of inconvenience as well as a burning sensation in the eyes.

Yn y blynyddoedd cynnar, ceid dŵr i'r plant drwy ddefnyddio pwmp a safai yng nghornel iard yr ysgol. Ymddengys fod hwnnw'n dechrau peri trafferth hefyd erbyn y flwyddyn 1908.

8.5.'08—The Architect's (Carms. Ed. Committee) Assistant visited to certify the pump, but could not do so, owing to the key of the Well's Trap Door being in possession of a local blacksmith, who had gone to Dalis Fair and whose wife could not find it. So the Assistant Architect's visit and expenses proved fruitless.

14.5.'08—An exceptionally cold day for young and old, complaining a fire should have been lighted.

14.5.'08—The pump has been put in working order.

11.12.'08—The stove causes a lot of inconvenience, continually blowing, and, with the high wind, the fumes emitted nearly suffocating us all. Doors and windows being opened to no avail.

25.1.'09—Mid-day, a boy kicked the football through the window, breaking a pane of glass; ordered to pay for same.

26.1.'09—Glass replaced in window, parents to pay. (Parents paid)

22.10.'09—Fires lighted today.

25.10.'09—The fire having been restarted, the *smoke* is the same as last year, blowing out and causing a lot of inconvenience to the children, who have to rub their eyes every other minute as it makes them smart. However, when it has got well lit it is not so bad, but the coal fumes enter the lungs and cause a very unpleasant taste in the mouth and throat all the day.

21.9.'15—Vincent Morgan, Esq., County Architect visited the school and inspected the premises. He also inspected a well on Cwmdawe Farm, not far from the school, from which it is hoped to get a supply of water to the school, as the pump is out of action.

25.11.'15—A clock for school use was received this week from Carmarthen.

13.3.'17—Today, the County Architect, Mr. Vincent Morgan together with Mr. Davies, Gelli, Llanycrwys, a member of the Education Committee, came to measure the garden plot which had been bought on Cwmdawe Farm.

27.4.'17—Gardening operations were commenced this week.

Y plant a'r athrawon (John Bowen, ysgolfeistr ac Elizabeth George)
ym 1908

Plant yr ysgol a'u hathrawon ym 1911
(Thomas Williams, ysgolfeistr ac Elizabeth George)
